Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 3, 4, 6-18, 20-26, and 31-33 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The instant claims have been amended to specify that the fixing device is between a combination of a fixing roller and either a pressing roller or a pressure belt, or a fixing belt and a pressing roller. A review of the specification shows various fixing devices disclosed, particularly with reference to Figures 15, 17, and 18. Figure 15 shows the combination of a fixing roller **17a** having a heating means and a pressure roller **17b** (also see spec. p. 133, top). The specification also discloses the combination of a fixing roller **17a** having a heating means and a pressure belt **27b** (see Fig. 17 & spec. pp. 139-140). The specification also discloses a specific combination of fixing belt having the construction shown in Figure 18 with a fixing roller **47b**. The specification as filed does not provide basis for a fixing belt or roller without a heating means.

Although the recent amendments to the claims do remove the combination of a fixing belt and a pressure belt as the fixing device, which was previously rejected as being without basis in the specification as filed, the amended claims do not specify a heat means as part of the fixing belt or roller discussed in the last Office action and reiterated above. The amendment

Art Unit: 1756

also does not address the combination of a fixing belt and a pressing roller. The specification as filed does not describe this invention noting the previous remarks concerning corresponding Figure 18 where a fixing belt and a fixing roller are employed in a fixing device in a specific arrangement.

The rejection is maintained because the amendment does not resolve the issues previously presented, as asserted in the traversal.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
